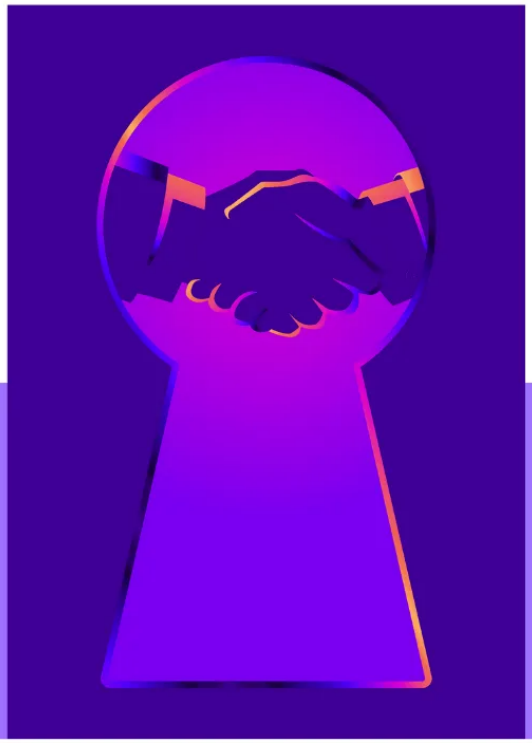
Lineal Compliance & Investigations



Navigating Global Investigations with Lineal's Expertise & Technology

As global anticorruption regulations continue to rise and international cooperation on anticorruption matters strengthens, the need for effective solutions to combat bribery and corruption in corporate practices has never been greater. And n today's hyperconnected world, the growth of collaborative data is reshaping the way we communicate and work together. As the use of communication platforms like Slack, Microsoft Teams, and Google Chat continues to surge, the volume and complexity of data generated by these tools are increasing exponentially.

With our in-depth experience in cross-border investigations, compliance matters, and government enforcement activity, we to assist clients around the world by delivering our robust suite of legal technologies, Amplify, trailblazing hosting applications, and leading processing and forensic resources.
